

PowidDian will supply the reception area for ACO members on the occasion of the 24 Hours of Le Mans with one of the hydrogen generators in its "MobHyl Power" range, as part of the ACO's CSR strategy to reduce the carbon impact.

PowidDian designs "zero emission" generator sets, an alternative solution to polluting and noisy diesel generators and will increase its range by offering new models on the market very soon.

The graphic features a blue and white hydrogen generator set labeled "MobHyl Power" and "PowidDian" on the right, connected to a rack of hydrogen cylinders on the left. A large blue archway frames the generator, with the text "GROUPE ÉLECTROGÈNE À HYDROGÈNE" and "ZÉRO ÉMISSION" on it. The "PowidDian" logo is also on the arch. In the top left, a race car is shown on a track. Text on the left side of the graphic includes "24H DU MANS" and "17-22 août 2021".
